

SUGGESTED CONDITIONS OF APPROVAL FOR NEW CLUB CUP

1. Club shall use steel shot for all future shooting until the shot fall zone is cleaned up to normal lead background levels and Wisconsin RCL levels for PAH contamination.
2. The Club shall use non-toxic clay pigeons that do not contain coal tar or pitch
3. The Club shall follow the Best Management Practices for Shooting Ranges as recommended by the Environmental Protection Agency.
4. The Club shall produce a written plan approved by the Town to clean up the shot fall site from lead and PAH contamination within 3 months of receiving a Conditional Use Permit from the Town.
5. The Club shall take steps to remediate the site from lead and PAH contamination to levels outlined in item 1 above within 12 months of receiving a Conditional Use Permit.
6. When the Club has remediated the shot fall zone of lead and PAH contamination it may request permission to use lead shot for shooting from the Town Board.
7. The Club shall perform comprehensive lead and PAH testing on the shot fall site every year until the contamination from lead and PAH is cleaned up to safe levels.
8. Upon the written request of nearby landowners, the Club shall perform surface and groundwater testing for lead and PAH contamination.
9. The Town will re-evaluate annually any approved C.U.P. for the first three years.
10. The Club shall report a "spill" to the DNR as suggested by the UW Extension Agent Soils Report.

SHOOTING DAYS

11. The Club may shoot up to 3 hours per day on Thursdays and Saturdays with exemptions for Thanksgiving week and Christmas.
12. The maximum number of shooters on Thursdays and Saturdays shall be 30 per day. Each shooter shall shoot a maximum of 50 rounds. The maximum number of shots in any given Thursday or Saturday shall never exceed 1500.

13. Hunter Safety Days need to take place during approved hours and days.
14. The Club shall keep records of how many shots were fired per day.
